CHILDREN'S SURGICAL CENTRE

Rehabilitation surgery for disabled Cambodians
National Rehabilitation Centre, Kien Khleang

Medical Student Electives

Last Updated 16/01/2023

Dear Students,

Thank you for your interest in our organization! You can find out more about us by reading the CSC Visitor Guide and learn more about Cambodia in one of the guide books, such as the Lonely Planet series.

We receive a lot of enquiries and often do not have the time or resources to answer numerous emails. Please do as much independent research as possible before contacting us with questions.

We only do surgery (not internal medicine, pediatrics, emergency medicine, etc.) and due to high demand, will only accept students who intend to be surgeons after graduation. Anyone coming to us needs a personal reference from a surgeon.

Those who want to spend time with us at CSC MUST:

- Intend to become a surgeon after graduation and send an accompanying reference from a surgeon
- Commit to a MINIMUM of 6 weeks with us
- Be able to work independently of anyone who might accompany you
- Be in the final year of your degree
- Send us a copy of your CV at info@csc.org and letter of reference from a surgeon
- When sending us your CV and a Letter of Reference, please also let us know which area of CSC's services interests you most (e.g., Orthopedics, ENT, Plastics/Reconstructive, Eye, etc.)

If you are keen to seeing non-surgical healthcare in Cambodia, we recommend:

- [Sihanouk Center of Hope](#), an American hospital in Phnom Penh.
- [National Paediatric Hospital](#), the only government-run paediatric hospital in the country, also located in Phnom Penh.
- [Angkor Hospital for Children](#), a paediatric hospital in Siem Reap run by the NGO "Friends Without a Border."
- [Mercy Medical Centre](#), Phnom Penh
